Mirror polish is our standard ,there is no smog on the steel ,and there is no Bump on the finishes ,it can be clear pictured with our face. And for the corner polish,we can deal with it very clearly and perfect .we have many finishes options .

Like shiny and brushed .brushing is very slim and orderly .

Painting: we check every piece with carefully before send to the painting .it must be even dry ,without scratches ,no rust after painting . And our team will be double pack and unpack it before into box . There is one time package happens after taking out from the oven ,it

would be wrap with beige fabric ,and move it to our package workshop .our work will take all the begie fabric out ,wear it with new clothes .white thicker fabrics .plywood conner protecting board ,PE foam ,KMK 5 layers cartons .

## Chrome.

For stainless steel .we made the craftsmanship with chrome on the finishes to be different color .ico oven with different electrical temperature ,and the Physical reaction will be different colors. Gold .rose gold . Colorful ,black .cooper and so on . our gold color is very natural and luxury .and stable . Because the work shop for chorome is very big .so the furniture can put in big Interval ,it will not be scached .

## 2. Marble

for marble ,ther is one point for challenge .

One is the size ,when the marble inside into the frame ,the dimension should be exactly right .

1mm difference will not be avaible .if bigger than 1mm ,the marble will not fit in ,if small than 1mm ,there will be gap .but for us ,it is no problem ,because we buyed the water knife machine ,it cut the marble with sand and mastered by computer .so the size has no difference .

Options for artificial marble ,nature marble and rock board.

## 3. Uphoustery

Some factories can make very cheap upholstery .but looks same . The difference is the fabric quality and the works .

What moka make the farbic is 320g/m denstry for the fabric . So it will be can used for commercial and durable .

And our unique skill is that we sewing the foam together with the fabrics .so the shape look will be very perfectly .thats why the price of the normal ottoman is high cost than other suppliers .it is really different .
